Mobile: +91-9026104017

SKILLS

Languages:	Java, Python, JavaScript
Frameworks:	React.js, Flask/Django, HTML, CSS, REST APIs, Scikit-learn, Pandas, NumPy
Tools/Platforms:	MySQL, Git, GitHub, Docker, AWS, VS Code, Postman
Soft Skills:	Problem-Solving, Team Collaboration, Leadership, Adaptability, Communication

PROJECT

Online Shop GitHub	May 2026 – Jun 2026
- Developed a production-style full-stack e-commerce platform featuring JWT authentication, product catalog, shopping cart, secure checkout, and payment gateway integration. - Designed and implemented RESTful backend APIs for user management, order processing, inventory control, and payment verification with SQL database integration. - Integrated advanced features including product search, filtering, category navigation, Redis caching, and responsive UI optimization for improved performance and scalability. Tech: Python, Flask, JavaScript, HTML, CSS, SQL, REST APIs, Redis, Docker, JWT Authentication	
API-Hub Analytics Platform GitHub	Feb 2026 – Apr 2026
- Developed a scalable API-driven web platform integrating multiple third-party REST APIs with real-time data aggregation, caching, and analytics dashboards. - Implemented asynchronous API handling, Redis caching, WebSocket-based live updates, and optimized database queries to improve response time and scalability. - Containerized the application using Docker and deployed cloud-ready services with structured logging, error handling, and automated testing pipelines. Tech: Node.js, Express.js, React.js, Redis, PostgreSQL, Socket.io, REST APIs, Docker, JWT, Tailwind CSS	
Multivariable Regression-Based Income Prediction Platform GitHub	Dec 2025 – Feb 2026
- Built a full-stack machine learning platform to predict user earnings using multivariable regression models and real-world datasets. - Trained and compared multiple regression models such as Linear Regression, Random Forest, and XG-Boost using Scikit-learn. - Evaluated model performance using R² Score, MAE, and RMSE and deployed the application using Docker and cloud hosting platforms. Tech: Python, Fast-API, Scikit-learn, Pandas, NumPy, Matplotlib, Plotly, React, Docker, Machine Learning	

TRAINING

Placement Ace: Java Bootcamp (Leet-Code–Code forces Edition)	Jun 2025 – Jul 2025
- Completed an intensive skill development program focused on Java programming and problem-solving. - Strengthened core Java, OOP concepts, and Data Structures & Algorithms through LeetCode and Code forces practice. - Applied learned concepts by developing a Java-based Expense Tracker / Personal Finance Manager project. - Implemented features such as transaction management, budgeting logic, and financial data handling. Tech: Java, OOP, DSA, Servlets, JSP, MySQL, Maven, Git	

CERTIFICATES

• Elements of AI: Introduction to AI University of Helsinki & Minna Learn Link	Oct 2025
• Introduction to Hardware and Operating Systems Coursera Link	Sep 2024
• Computer Communications Specialization University of Colorado Coursera Link	Sep 2024
• Responsive Web Design FreeCodeCamp Link	Nov 2023

ACHIEVEMENTS

- Filed an Indian Patent titled “A System for Recording, Reconstructing, and Analyzing Dream Content”.
- Developed and deployed a scalable web application with 10,000+ monthly users, demonstrating real-world impact

EDUCATION

Lovely Professional University <i>Bachelor of Technology - Computer Science and Engineering;</i>	Punjab, India Aug 2023 – Jul 2027
Vishwanath Academy <i>Intermediate; Percentage: 71</i>	Lucknow, Uttar Pradesh Apr 2021 - Mar 2022
Vishwanath Academy <i>Matriculation; Percentage: 76</i>	Lucknow, Uttar Pradesh Apr 2020 - Mar 2021
